> ***Great development makes them work.***

Applications

Crafting intuitive and engaging digital experiences through user-focused design and collaboration.Crafting intuitive and engaging digital experiences through user-focused design and collaboration.Crafting intuitive and engaging digital experiences through user-focused design and collaboration.

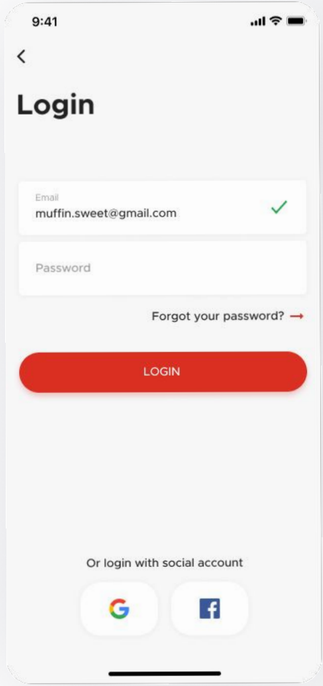
Faction Store

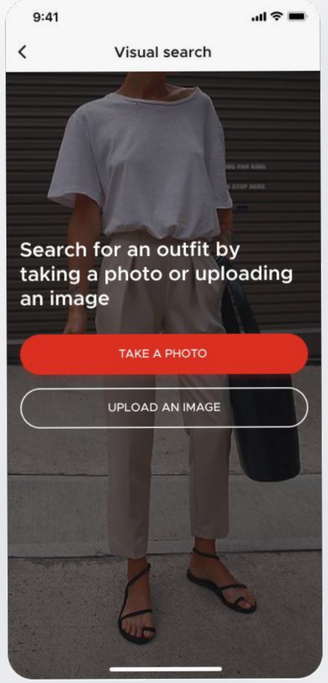
(Portfolio Project Only)

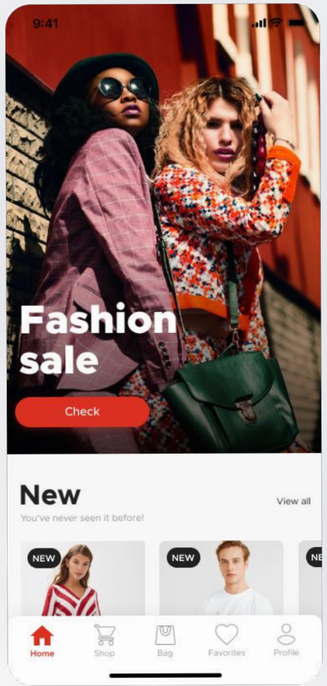
01

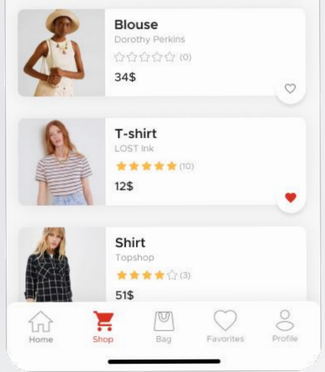
Collaborating on the mobile application design for a fashion store, I revamped the UX/UI to create a more visually appealing and user-friendly platform. Here's an overview of the enhancements made:

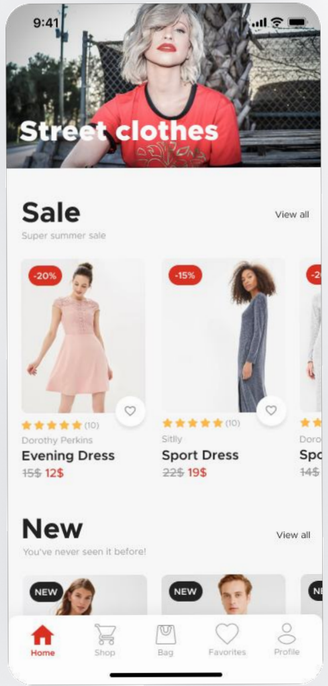
- Designed the user interface for both the customer and admin versions of the app, significantly improving navigation and user engagement.
- Overhauled the web application interface for admin and user, aligning it with the mobile app for a cohesive cross-platform experience.
- Developed responsive landing pages that effectively communicated the brand's ethos and showcased the latest fashion collections.
- Created detailed wireframes as a blueprint for the application's design, ensuring clarity and efficiency in the development process.
- Established a comprehensive design system to maintain consistency in the visual and functional elements across the app and web interfaces.

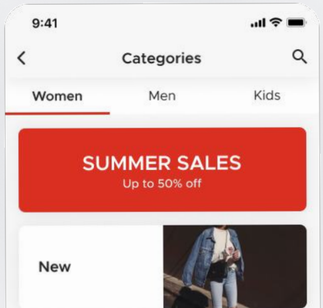












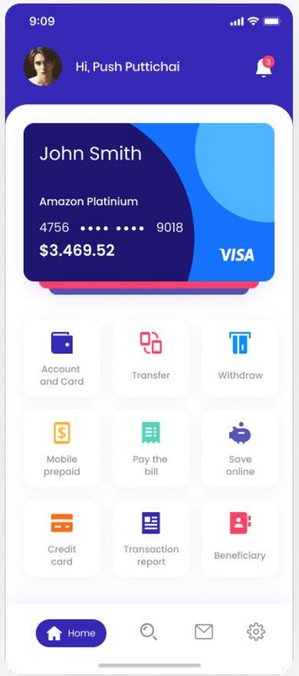
Banking Application

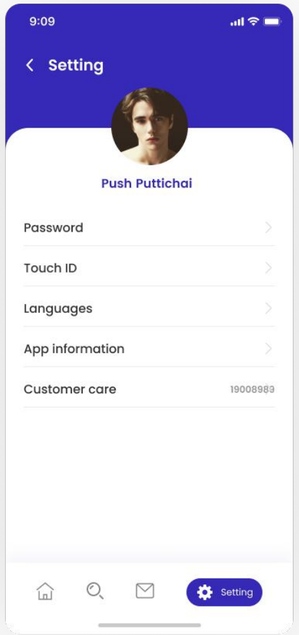
(Portfolio Project Only)

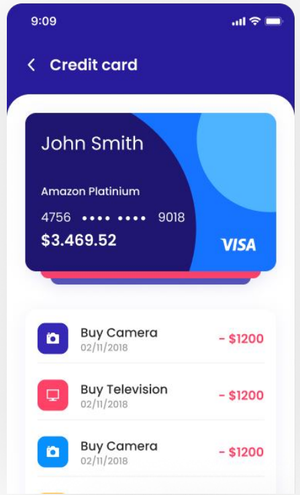
02

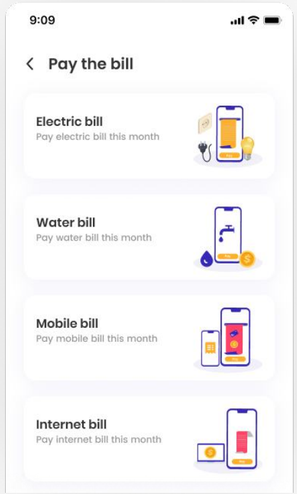
The designed concept is an application for banking online application. In this app, users can see the balance , exchange rates, credit cards and transaction history etc..

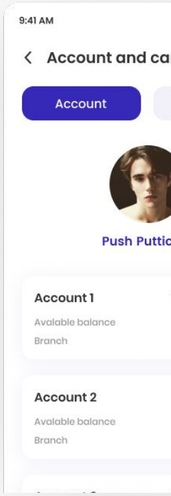
- Designing the user interface of the app
- Designing Light and dark themes.
- Making the design system

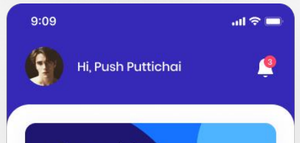


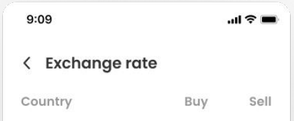


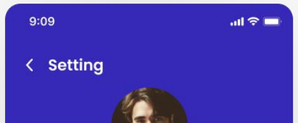


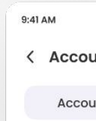












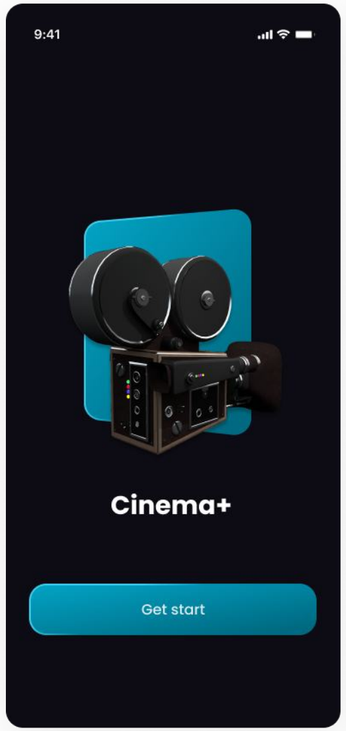
Cinema+

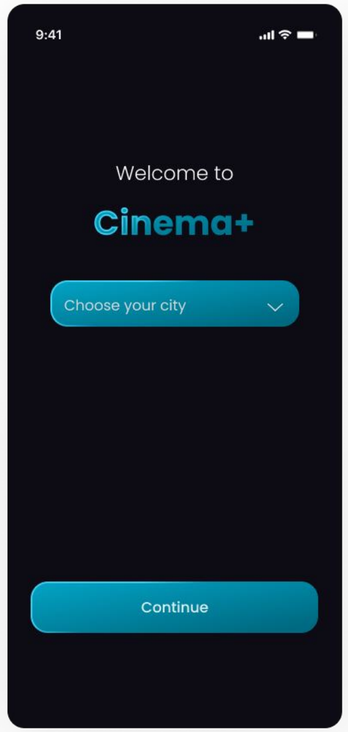
(Portfolio Project Only)

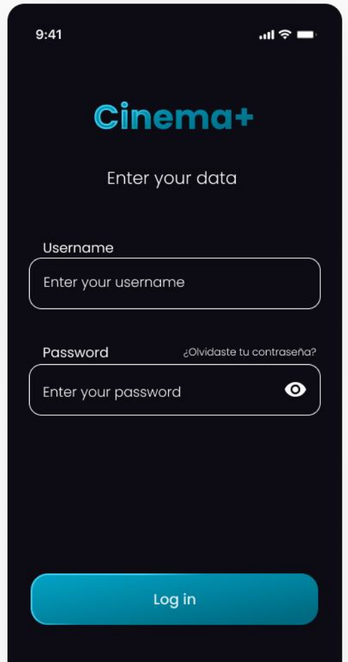
03

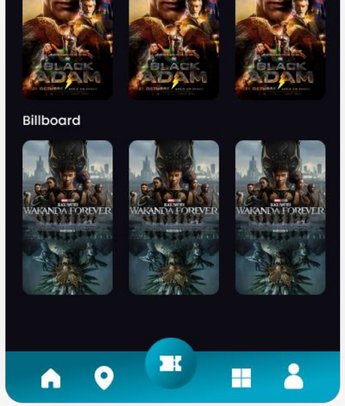
The Cinema+ is a online booking app that focuses specifically on movie booking. Users and movies can introduce themselves and their abilities in this space.

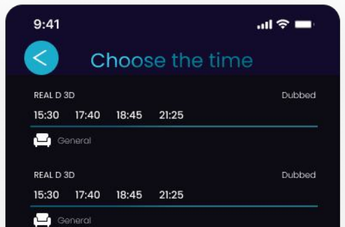
- Designing the user interface of the app
- Designing the Wireframe
- Making the prototype
- Making the design system

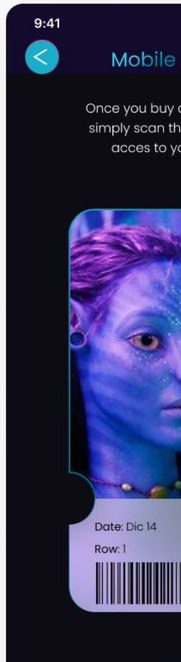












Windows Phone UI

(Portfolio Project Only)

04

Windows Phone Visual Design project is focused on crafting a distinctive and user-friendly interface for Windows smartphones. This design initiative emphasizes a clean, minimalist aesthetic that aligns with the modern Windows operating system. The project aims to provide a unified and coherent visual experience across all native applications, integrating well with the system's architecture. Users can expect a consistent design language that enhances usability and accessibility.

- **Designing the User Interface**: Developing a sleek and simple interface that embodies the Windows Phone's design philosophy.
- **Designing the Wireframe:** Structuring the core layout of the phone's interface to support efficient user interactions and ease of access.
- **Making the Prototype:** Creating prototypes to evaluate the visual and functional aspects of the interface design.
- **Making the Design System:** Building a comprehensive design system that includes guidelines for typography, color schemes, iconography, and UI elements.
- **Designing for Tablet and Mobile:** Adapting the interface design to fit various screen sizes and orientations, ensuring a consistent user experience across all Windows devices.

05

Lottery Win

(Portfolio Project Only)

Lottery Win is a fantasy game application designed for both casual and avid gamers. It offers a customizable gaming environment where users can create and manage their fantasy teams across various sports. The app includes interactive and visually engaging elements such as live score updates, player statistics, and game analytics. Players from different leagues can be drafted, and users can compete in multiple contests to win exciting prizes.

- **Designing the User Interface:** Creating an engaging and intuitive interface that enhances the user's gaming experience.
- **Designing the Wireframe:** Laying out the foundational structure of the app to ensure smooth navigation and functionality.
- **Making the Prototype:** Developing a working model of the app to test its usability and overall design.
- **Making the Design System:** Establishing a cohesive set of design standards and components for consistent application across all screens.
- **Designing for Tablet and Mobile:** Optimizing the app's interface for various devices to ensure a seamless experience on tablets and mobile phones.
